To whom it may concern

Nutrifare Ltd. is pleased to write this letter of recommendation for Applied Chemicals NZ Ltd. We sincerely appreciate their services that we are using since Jan 2013. Applied Chemicals were preferred after I had enough problems with our previous service provider. Applied Chemicals were able to supply us good service and chemicals at very competitive price and they understood my requirements and met expectations. We are recommending Applied Chemicals NZ Ltd to others because they have:

- ❖ Very professional and committed staff who always go an extra mile to help.
- ❖ Supplied chemicals that meet our needs.
- ❖ Deliveries on time and as per ordered- Exceeding expectations by delivering to our site on short notice on several occasions.
- ❖ Provided practical effective training to our chemical handlers on site when requested.
- ❖ Servicing done on regular basis with proper clear reporting of findings & issues as well as corrective actions.
- ❖ Installed & maintained chemical dispensing units as required.
- ❖ Helped in getting our laundry procedures validated in compliance to ASNZ 4146- 2000 Standard.
- ❖ Prompt response to all issues and queries/requests.
- ❖ Excellent technical support

I am pleased to say that I have no hesitation to use Applied Chemicals in future as well and wish them even brighter future for their business.

Please feel free to contact for additional information.
